COLLECTION

The ONLY range  
designed in conjunction  
with, tested and approved by the  
Chiropractors Association of Australia

Comfort & Support for Every Body

For over 30 years Sleepmaker® has produced the only bedding range designed in conjunction with, tested and approved by the Chiropractors' Association of Australia.

The Chiropractors' Association of Australia has long recognised the importance of the relationship between your spine and your health. When abnormal stresses are placed on your spine, this may cause tension in adjoining ligaments and muscles. Sleep allows the body to rejuvenate, both physically and mentally, to ensure you wake refreshed to make the most of your day.

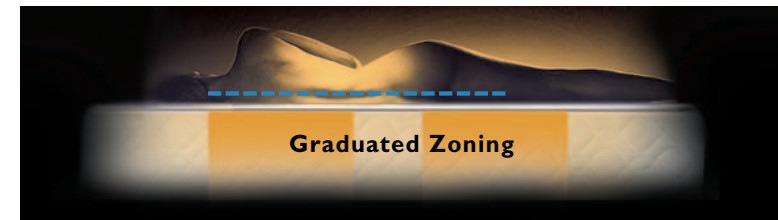

Chiropractors understand the vital role that sleep plays in your health and well-being, that's why Sleepmaker has joined forces with the Chiropractors' Association of Australia to develop a range of bedding designed for correct postural alignment and relaxation of the spinal muscles.

A bed that is too firm will elevate the hips & shoulders, causing the spine to sag in the lower back region. Similarly, a bed that is too soft will cause the spine to sag at the hips, both resulting in localised pressure on the spine that can lead to fragmented sleep and longer term health problems.

Because everybody is different, it's important to choose a bed with the right support and comfort for you

The Sleepmaker Chiropractic Collection offers a choice of support levels to meet your body shape, size, lifestage and personal preferences. That's why our mattress has been engineered differently from traditional mattresses.

The advanced Miracoil and Duracoil spring systems include a range of features that provide correct spinal alignment for healthy & invigorating sleep. The graduated zoning and unique coil formation increases support for the heaviest parts of the body and lower back, reducing mattress sag & the detrimental effect it can have on your spine. The body contouring zones not only gives more support where needed but also provides a more comfortable, restful sleep.

The ONLY range designed in conjunction with, tested and approved by the Chiropractors' Association of Australia.

  
Gary A. Roberts D.C. Chairman Posture Committee  
Chiropractors' Association of Australia.
