## THE MOST BEAUTIFUL SLEEP EVER MADE™

There is nothing more beautiful than a luxurious night's sleep. With SleepMaker Cocoon®'s unique Sensorzone® technology and luxury materials, a beautiful night's sleep is exactly what you'll get.

IT TAKES OUR  
CRAFTSMAN  
HOURS TO HANDMAKE  
EACH BED.  
JUST SO YOU CAN FALL  
ASLEEP IN MINUTES.

SleepMaker  
COCOON®

## LUXURY & CRAFTSMANSHIP

We all deserve a little luxury, and that's why only premium materials such as silk and cashmere and designer comfort materials are included, providing 5 star comfort.

We believe craftsmanship is the single most important element in building any mattress. Over 100 years of experience goes into each SleepMaker Cocoon and our mattress makers build up each layer by hand.

## THE TECHNOLOGY STORY

### ① Quilt

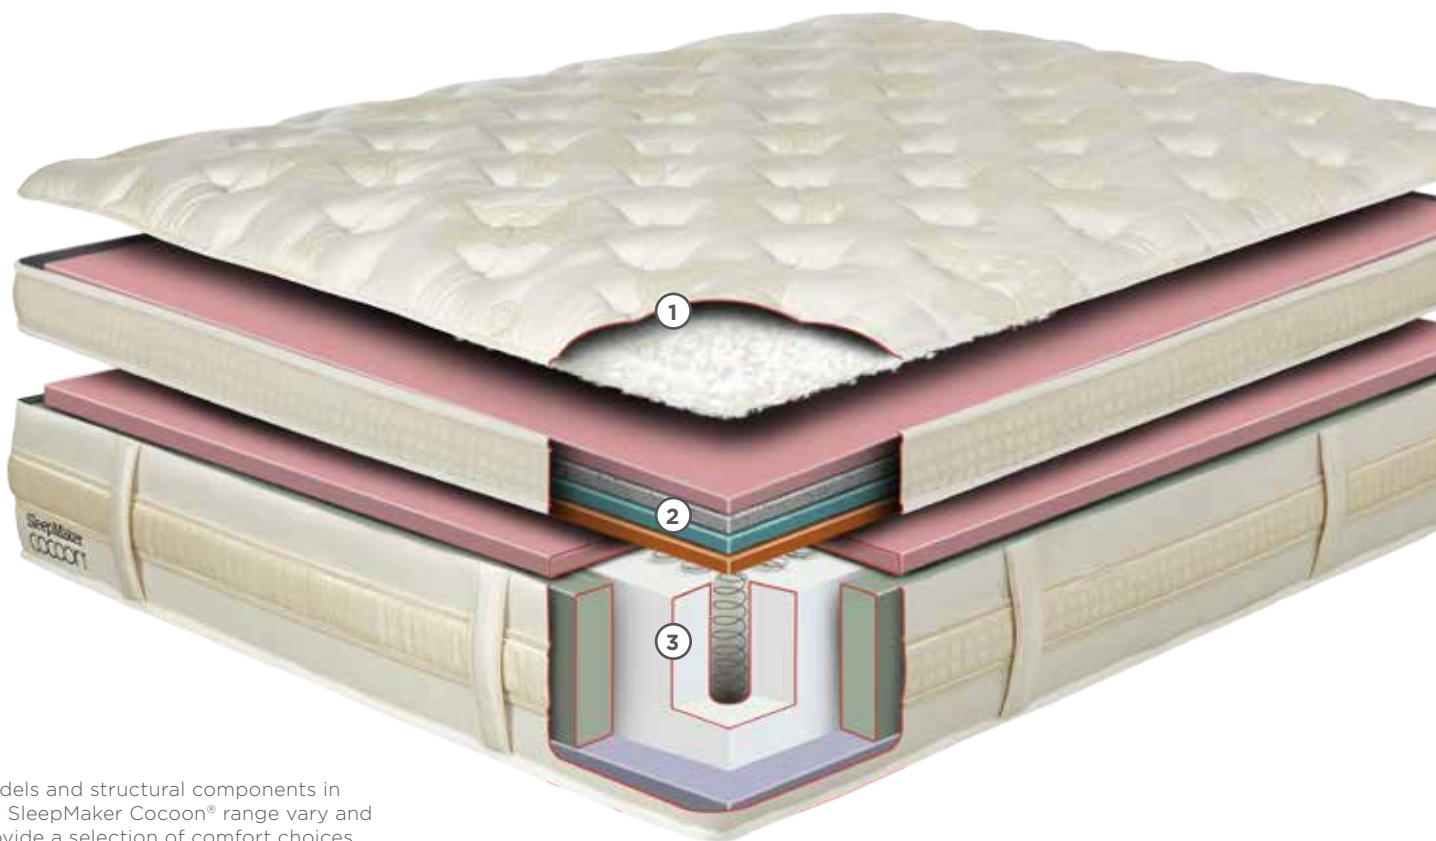

Exotic fibres such as lustrous natural silk and luxurious cashmere helps improve airflow and breathability in the mattress.

### ② Comfort Layers

New pressure relieving comfort layers provide a luxurious feel without compromising on support and therapeutic qualities. Anti-microbial treatment of the comfort layer foams reduce the spread of allergens.

### ③ Sensorzone® Support System

The ultimate combination of spring and foam technologies provide targeted support exactly where you need it. The Sensorzone® core offers 100mm of unique spring technology deep within a Dreamfoam core, while the Sensorzone® Advance core offers full height springs to provide unrivalled sleep comfort and durability.

Models and structural components in the SleepMaker Cocoon® range vary and provide a selection of comfort choices. Models may vary between retailers.

## HOW TO CHOOSE YOUR BEAUTIFUL SLEEP

- Wear loose fitting and comfortable clothing. Removing footwear will allow you to feel the full support and comfort of a mattress.
- The SleepMaker Cocoon® range provides a selection of comfort and support choices. Inform your sales person of any ailments or sleeping issues to find the best suited to you.
- If you feel aches and pains at night, they may take time to cause discomfort while you're trialling beds. Spend 5-10 minutes on each bed and make sure you lie in the position that you normally sleep in.
- If you sleep with a partner, it's best to select a mattress together. Move positions while your partner lies in their most comfortable position. This will enable you to determine how effective the bed is at minimising partner disturbance.
- Your pillow makes up 25% of your sleeping surface. Ask to trial a SleepMaker Cocoon® pillow to ensure your neck and shoulders are as supported as your body.
